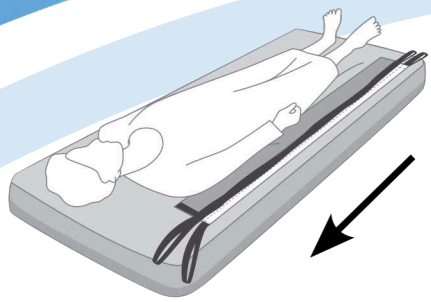
DAVID SCOTT COMPANY PATIENT TRANSFER SLIDE SHEET

The Slide Sheet is designed to assist healthcare providers in safely and efficiently repositioning patients, enhancing comfort and reducing the risk of injury during handling. The Slide Sheet allows for easy movement and alignment of patients on the bed, making repositioning tasks more manageable. Additionally, wedges can be used with the Slide Sheet to provide support and offload pressure from the sacrum, offering an added benefit of pressure relief and helping to prevent pressure sores. This system is essential for maintaining patient health and comfort, particularly for those who are bedridden or have limited mobility.

Instructions:

1.

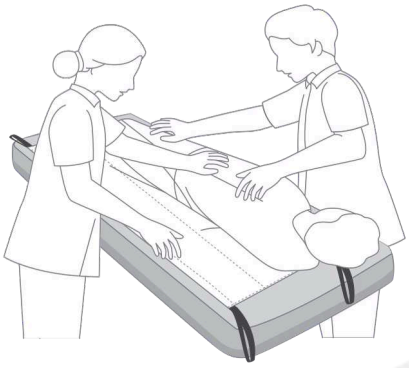


Prepare the Sheet: Unfold the Slide Sheet and place it next to the patient, ensuring the top aligns with the patient's shoulders.

2.

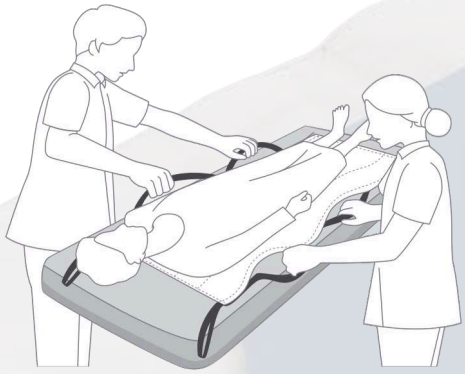
Roll & Tuck: Gently roll the patient onto their side, following proper patient handling policies. Tuck the Slide Sheet under the patient's side.

3.



Unroll the Sheet: Move to the opposite side of the bed, roll the patient away from you, and unfold the sheet completely.

4.



Center the Patient: Using the handles of the OrthoGlide Sheet, gently slide the patient to center them on the bed.

Model Description	Dimensions
DSC-9582-3555 1 Slide Sheet	35 x 55 in.
DSC-9582-3555K 1 Slide Sheet w Wedges	35 x 55 in & 16 x 11 x 5 in.

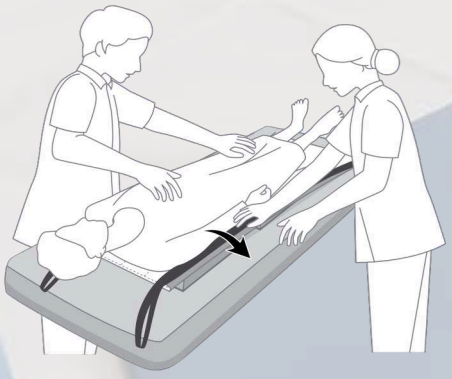
Offloading the Sacrum

5.

Log-Roll the Patient: Carefully log-roll the patient onto their side, adhering to patient handling policies.

Position the Wedges: Place wedges under the Slide Sheet, positioning one wedge above and one below the sacrum. Ensure the wedges are placed to provide optimal support and offloading of the sacrum.

6.



Roll Back onto Wedges: Slowly roll the patient back onto the wedges, ensuring the sacrum is off-loaded between them, leaving about a fist's width of space.

Smooth Out the Sheet: Check for any folds or wrinkles under the patient and smooth them out to ensure comfort and effectiveness. (See instruction 4)

Positioning Wedges

- Slip resistant bottom prevents sliding.
- Breathable, low shear, stretch cover with antimicrobial protection reduces friction.
- Meets CA 117-2013.

Cleaning:

To spot clean, use a mild detergent and wipe as needed. For complete washing instructions, consult the specific product guidelines.

Caution:

Slide Sheet components are not designed for patient lifting and should not be used in combination with other lifting or positioning devices. If using wedges with Slide Sheet, do not use an Slide sheet to slide the patient onto the wedges; instead, use the log-roll method to place the wedges under the patient. Always follow your facility's guidelines for proper patient handling.

Weight Capacity: 575 lbs.
