UROCATCHER SYSTEM W/ CLAMPS

Equipment Purpose

Secures the Urocatcher Drape, which captures and directs fluid into suction or drainage during Urology and Gynecology cases

Features

- Clamps included for attachment to standard side rails
- Flexible band allows surgeons better patient access
- Urocatcher Band is reusable

⚠ Warnings

- Verify the clamp is firmly secured to the side rails. The band may become detached if it is not properly secured.
- To avoid contamination of the surgical site, do not use punctured or torn Urocatcher Drapes and do not hang objects from the Urocatcher Band.
- Monitor the Urocatcher Drape's drainage to ensure proper flow and to avoid spillage and/or contamination during usage. If the drainage is clogged, stop usage and clear the obstruction or replace the drape.

Instructions

1. Slide the clamps onto the side rails.
2. Tighten the screws to secure the clamp to the side rail.
3. Place the Urocatcher Drape over the Urocatcher Band and use Velcro to secure the drape.
4. Route the Urocatcher Drape drainage to the appropriate disposal device.
